

SIPELL® WT 19

Silicone Fluid Emulsions, functional

SIPELL® WT 19 is a non-ionic micro emulsion of an amino functional film forming silicone which does not contain volatile organic components (VOC).

Properties

SIPELL® WT 19 can be used as an additive in the finishing process of leather providing unique properties to automotive and furniture leather goods, especially a pleasant soft-hand.

SIPELL® WT 19 is mainly used in the treatment of leather for cloth and furniture.

Technical data

General Characteristics

Property	Condition	Value	Method
pH	-	approx. 6	Indicator strips
Solid Content	-	approx. 40 %	Microwave oven
Appearance	-	opalescent to slightly milky emulsion	-
Ionogenity	-	cationic / nonionic	-

All the information provided is in accordance with the present state of our knowledge. Nonetheless, we disclaim any warranty or liability whatsoever and reserve the right, at any time, to effect technical alterations. The information provided, as well as the product's fitness for an intended application, should be checked by the buyer in preliminary trials. Contractual terms and conditions always take precedence. This disclaimer of warranty and liability also applies particularly in foreign countries with respect to third parties' rights.

Applications

- Leather Finishing

Application details

SIPELL® WT 19 can both be used in the wet-end processing and in pure water-based finishing systems. The low-viscous dispersion can easily be diluted and provides very good compatibility with high-end top coat formulations. In order to achieve significant surface effects, it is recommended to add less than 12 % of SIPELL® WT 19 relative to the top-coat system.

Due to possible compatibility problems pre-tests are necessary if the cationic aminosilicone component is mixed with anionic greasing additives.

Suitable concentrations should be adjusted to 0.5 % on weight of Crust.

Packaging and storage

Packaging

SIPELL® WT 19 is available in 200 kg drums and 950 kg IBC

Storage

The "Best use before end" date of each batch is shown on the product label.

Emulsions showing signs of creaming should be agitated before use to assure uniform consistency. Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.

Safety notes

Comprehensive instructions are given in the corresponding Material Safety Data Sheets. They are available on request from WACKER subsidiaries or may be printed via WACKER web site <http://www.wacker.com>.
