

WACKER® FINISH WT 1650 LV

Functional Silicone Fluids

WACKER® FINISH WT 1650 LV is a non-reactive aminoethyl-aminopropylfunctional polydimethylsiloxane.

Properties

WACKER® FINISH WT 1650 LV is particularly suitable as active substance in softener formulations for the impregnation of fibers and textiles.

WACKER® FINISH WT 1650 LV imparts a very soft, drapable, and elastic touch to woven and knitted fabrics. WACKER® FINISH WT 1650 LV is considered to be the best softening agent for PES - knitwear.

WACKER® FINISH WT 1650 LV improves the wash-and-wear properties and the crease recovery angle, sewability and tear strength and reduces abrasion loss. The effects are fast to washing and dry cleaning.

WACKER® FINISH WT 1650 LV has little effect on the degree of whiteness in a softener formulation when usual application conditions are adhered to. As a rule no adverse effect on the the shade or colour fastness properties of coloured goods is observed.

Technical data

Specification

Property	Condition	Value	Method
Amine number	-	approx. 0.6 ml 1 N HCl/g	-
Viscosity, dynamic	-	approx. 1000 mPa·s	DIN 53019
Appearance	-	clear to slightly turbid fluid	-

All the information provided is in accordance with the present state of our knowledge. Nonetheless, we disclaim any warranty or liability whatsoever and reserve the right, at any time, to effect technical alterations. The information provided, as well as the product's fitness for an intended application, should be checked by the buyer in preliminary trials. Contractual terms and conditions always take precedence. This disclaimer of warranty and liability also applies particularly in foreign countries with respect to third parties' rights.

Application details

Processing:

WACKER® FINISH WT 1650 LV can be applied neat, from solution or emulsion. Suitable solvents are aliphatic and aromatic

hydrocarbons, chlorinated hydrocarbons, esters, higher alcohols and ketones.

Most textile processes are water based. Hence WACKER® FINISH WT 1650 LV is mainly applied from emulsion. WACKER® FINISH WT 1650 LV is suitable for the formulation of microemulsions and macroemulsions.

WACKER® FINISH WT 1650 LV can be used as sole active substance in softener emulsions or in combination with other components, e.g. paraffines, esters of fatty acids, etc. Compatibility of the components has to be checked in each individual case.

Emulsions of WACKER® FINISH WT 1650 LV are diluted to the optimum concentration for the specific fabric.

Application can be done by padding or exhaustion.

Packaging and storage

Storage

Store in a cool dry place.

The 'Best use before end' date of each batch is shown on the product label.

Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.

Safety notes

Comprehensive instructions are given in the corresponding Material Safety Data Sheets. They are available on request from WACKER subsidiaries or may be printed via WACKER web site <http://www.wacker.com>.
